It contains basic conjugations and comprehensive usage patterns for 152 irregular verbs (all the irregular verbs that you will probably encounter), plus 403 of the most commonly used regular verbs: 555 verbs in all, with more than 14,000 example sentences. No other book provides these unique features: A complete listing of the complements for each verb Verb complements are grammatical structures that verbs use to make correct, meaningful sentences. English has 18 basic complements, plus dozens of combinations of these. For instance, the verb help, when it means "assist, support," may use two complements together: an object and an infinitive. The infinitive, however, must be in its base form, that is, used without the to that normally accompanies an infinitive. VERB FORMS AND TENSE USAGE The Six Basic Verb Forms Six basic verb forms are used to create the entire tense system of English: base form, present, past, infinitive, present participle, and past participle. These forms are illustrated in the following chart by the regular verb walk and the irregular verb fly. Base Form The base form of a verb is its form in a dictionary entry. For example, if you looked up sang, the dictionary would refer you to the base form sing. The base form is also the source (or base) for the present (with a few exceptions), infinitive, and the present participle of the verb, whether the verb is regular or irregular. The base form is used as a verb in three ways.(1) It follows certain helping verbs, the most important being the modal auxiliary verbs or modals for short: can/could, may/might, will/would, shall/should, and must. (Modal verbs themselves have no base form, infinitive, present participle, or past participle; they have only present and past forms.) Note the base form of the verb is in the following sentences. I may be a little late.He will be in New York all week.You must be more careful.Other verbs followed by the base form of a verb include dare (with not), need (with not), and help. This includes the base form, past tense and past participle. See what each different part means. The first column contains the base form of the verb. The base form is the verb in its purest form — not present, past or continuous tense, and not even infinitive (meaning there is no "to" preceding it). It's just the verb, plain and simple. It serves as the foundation on which you conjugate the verb into all its different tenses and forms. Are you going to eat a 5-foot-long hot dog?Let's draw a picture. It's time to begin the class. The second column contains the verb in its past tense form. This is the form you use when you talk about something that happened in the past — just one event, not relative to any other event. Since these words are irregular, you'll notice they don't have the common -ed at the end like regular verbs. See a few examples at play. I ate a 5-foot-long hot dog.She held the door for me. We hid from the teacher. The third column contains the verb in its past participle form. The past participle is the form we use after have or had in present and past perfect sentences. Check out a few different example sentences using past participles. We have eaten at Roma several times.He had never flown in an airplane before his trip to Guatemala.I have built my model for the contest. We can also use the past participle as an adjective.
